SONNET

Audio Processor

SONNET

The SONNET Audio Processor is the latest CI & ABI audio processor from MED-EL. SONNET delivers exceptional hearing in an easy-to-use and reliable design. SONNET features built-in water resistance, adaptive microphone technology, hands-free control, excellent battery life, and easy connectivity. SONNET is fully compatible with all multichannel MED-EL cochlear implants from the past 20+ years, so recipients can upgrade to SONNET with a simple fitting. And with the Micro Rechargeable Battery, SONNET is the lightest audio processor available.

SONNET EAS

SONNET is also available as an EAS Audio Processor. The SONNET EAS Audio Processor is our 3rd-generation audio processor with Electric Acoustic Stimulation (EAS) technology. EAS combines acoustic amplification and electrical CI stimulation, which enables recipients to take advantage of their residual natural hearing, for more natural hearing across a full spectrum of sound. The SONNET EAS Audio Processor has all the features of the SONNET Audio Processor, with an additional acoustic unit and earpiece for acoustic amplification.

ActiveWear for SONNET

ActiveWear is the smallest audio processor wearing option available and is the ideal choice for younger children, or active adults. It allows the battery pack to be attached to clothing, leaving just the lightweight control unit behind the ear. With ActiveWear, children have a lighter way to wear SONNET all day long, whereas adults have a more secure option during sports.
